Amedisys | Remote

Jul 2025 - Present

Business Development Data Analytics Trainer and Hospice Growth Enablement Specialist

- Lead recurring analytics education for hospice business development new hires and field teams, helping users interpret Power BI reporting and apply liaison, account, care center, referral, admission, and conversion metrics.
- Translate complex dashboards, KPIs, and business-development concepts into practical guidance for audiences with varying levels of technical experience.
- Design structured learning experiences, microlearning content, user guides, job aids, facilitator scripts, and reference resources that reinforce analytics adoption beyond live training.
- Build Power Apps solutions that support field coaching, liaison assessments, scoring, leadership review, acknowledgements, action planning, and performance documentation.
- Develop Power Automate workflows for training-completion records, duplicate validation, SharePoint list updates, confirmation emails, notifications, and administrative processes.
- Design and maintain SharePoint and Viva Connections resources that centralize reporting tools, training content, business-development resources, and frequently used applications.
- Partner with business-development leaders, field trainers, operational stakeholders, and technical teams to translate business needs into scalable reporting, training, and workflow solutions.

HouseWorks LLC | Waltham, MA | Remote

Aug 2023 - Apr 2025

Business Intelligence Analyst

- Designed and developed interactive Power BI dashboards that improved access to operational and business performance metrics.
- Wrote SQL queries to support reporting requirements and deliver reliable information aligned with organizational goals.
- Performed data validation and system testing to confirm the accuracy and reliability of data flowing from source systems into reporting tools.
- Created technical documentation, user guidance, and reporting resources that helped business teams understand and use analytics solutions effectively.
- Collaborated with business and technical stakeholders to define reporting needs, resolve data issues, and deliver solutions within established project timelines.
- Worked with AWS Glue and Amazon Athena within cloud-based reporting and data workflows.

PROFESSIONAL EXPERIENCE - CONTINUED

BAYADA Home Health Care | Pennsauken, NJ

Jul 2018 - Aug 2023

Senior Associate, Data Operations Analyst

- Developed and maintained SQL queries and Tableau dashboards that provided stakeholders with actionable operational and performance insights.
- Partnered with business leaders to define KPIs, reporting requirements, and performance measures aligned with organizational goals.
- Performed data validation, system integration testing, and report testing to ensure the accuracy and reliability of business information.
- Documented data systems, workflows, reporting processes, and technical procedures to improve clarity, consistency, and knowledge sharing.
- Collaborated with cross-functional business and technical teams to investigate data issues, clarify requirements, and deliver reporting solutions.
- Trained and mentored junior analysts, strengthening team knowledge and supporting consistent analytics practices.

SELECTED ANALYTICS & AUTOMATION PROJECTS

- **Field Coaching and Assessment Application:** Designed a Power Apps solution for structured coaching, competency scoring, narrative feedback, action planning, leadership review, and liaison acknowledgement using SharePoint-based data.
- **Training Completion and Acknowledgement Automation:** Developed Power Automate workflows with duplicate checks, SharePoint list updates, confirmation messages, completion tracking, and administrative notifications.
- **Hospice Business Development Resource Hub:** Built SharePoint and Viva Connections resources that organize reporting, training, tools, and audience-specific content in a centralized experience.
- **Analytics Learning Program:** Developed progressive Power BI education, user guides, facilitator resources, and short-form microlearning covering liaison, account, care center, referral, admission, and conversion metrics.
